SUPPORT IN CASE OF RESTLESSNESS AND STRESS

LONG-TERM USE

Support in case of restlessness and stress

stress out TABLETS

Tablets – packaging: 10 tabs. and 30 tabs.

stress out PASTE

Paste – net weight: 30 g

Action of active ingredients:

L-TRYPTOPHAN

- reduce muscle tone and susceptibility to stress
- is an essential amino acid - it must be supplied with the diet
- is a precursor of serotonin (a mood-regulating neurotransmitter), necessary for its synthesis

TAURINE

- inhibits hyperactivity during periods of stress
- has an affinity for GABA receptors (a neurotransmitter that inhibits the activity of neurons in the nervous system), thus reducing excitability, the excess of which can lead to increased feelings of anxiety

L-THEANINE

- calms without causing torpor
- promotes the activity of alpha brainwaves responsible for inducing a relaxed state
- its source is green tea leaves

UNSATURATED FATTY ACIDS OF THE OMEGA-3 FAMILY (ONLY IN THE PASTE)

- DHA and EPA ACIDS counteract the cognitive decline caused by chronic stress
- their source is fish oil

B VITAMINS

- are necessary for the proper functioning of the nervous system

How to use Stress Out TABLETS?

1 tablet/10 kg of body weight per day. If necessary, increase dose to 2 tablets/10 kg of body weight per day.

How to use Stress Out PASTE?

3 g/10 kg of body weight per day. If necessary, increase the dose to 6 g/10 kg of body weight per day. One teaspoon is equal to 6 g of paste.

It is recommended to administer selected preparation continuously and continue even after the stress stimulus has disappeared. For dogs and cats over 3 months of age. Does not cause addiction.

Recommendations for using Stress Out TABLETS and Stress Out PASTE

- as a support during behavioural therapy for sensitive animals and those experiencing chronic stress, e.g.: separation anxiety, problems adapting to changes in the environment – moving house and socialisation after adoption, hyperactivity, excessive timidity, susceptibility to diseases caused by stress – psychogenic dermatoses, FIC in cats
- it helps to alleviate the effects of prolonged stress

Support in sudden situations causing stress

stress out SHOT TABLETS

Tablets – packaging: 10 tabs.

Action of active ingredients:

α-CASOZEPINE (Lactium®)

- is a natural peptide derived from cow's milk, helping mammals to achieve a state of relaxation (its mechanism of action has been recognised in new-borns fed with breast milk)

L-TRYPTOPHAN

- reduce muscle tone and susceptibility to stress
- is an essential amino acid - it must be supplied with the diet
- is a precursor of serotonin (a mood-regulating neurotransmitter), necessary for its synthesis

B VITAMINS

- are necessary for the proper functioning of the nervous system

How to use Stress Out SHOT TABLETS?

1 tablet/10 kg of body weight per day, at once between meals.

How to use Stress Out SHOT PASTE?

3 g/10 kg of body weight per day, at once between meals. One teaspoon is equal to 6 g of paste.

The expected effect can be achieved on the first day of application. In individual cases, it may be necessary to start administration 2–5 days earlier. Administer for a maximum of 3 weeks. For longer use, consult your veterinarian. For dogs and cats over 3 months of age. Does not cause addiction.

stress out SHOT PASTE

Paste – net weight: 30 g

Recommendations for using Stress Out SHOT TABLETS and Stress Out SHOT PASTE

- in sudden situations causing stress, e.g.: sudden changes, visit to the vet, grooming salon, fireworks, storm, travel, hospitalisation, medical procedures (e.g. drips)
