# LINE WITH BORIC AND ACETIC ACIDS

Topical skin care during skin problems therapy caused by bacteria and yeast

Volume: 100 ml

dr seidel  
spray with  
boric  
and acetic  
acids

— specialistic spray for skin care of dogs and cats, its **acidic pH (in the range of 4,5-5,5)** creates an environment on the skin surface that is unfavorable for the development of microorganisms.

#### Action of active ingredients:

##### **BORIC ACID 2% AND ACETIC ACID 2%**

- have antibacterial and anti-yeast properties
- lower the pH of the skin in dogs and cats (they acidify the environment)

##### **ALANTOIN AND PANTHENOL**

- they soothe irritations, support the natural healing processes and regeneration of the epidermis

##### **GLYCERINE**

- it has a moisturizing effect

#### How to use DR SEIDEL SPRAY WITH BORIC AND ACETIC ACIDS?

Wash the area of skin to be treated with water before spraying. Spray from a distance of several cm. Repeat as required.

In the case of fearful animals, the spray can be applied directly to the skin without using an atomizer. Protect the eyes, ears, and mouth of the animal.

For skin problems, consult your veterinarian about the frequency and method of use.

**Warning:** Avoid contact with eyes. Prevent the animal from licking the treated skin area.

#### Recommendations for using DR SEIDEL SPRAY WITH BORIC AND ACETIC ACIDS

- for topical skin care of dogs and cats during skin problems therapy caused by bacteria and yeast, with oily seborrhoea and inflammation skin between the toes of the paws (*pododermatitis*)
- for topical skin care of brachycephalic dogs, especially in the area of facial skin folds
- especially helpful in the care of animals that cannot be bathed

## Skin care during skin problems therapy caused by bacteria and yeast

Volume: 220 ml

### dr seidel shampoo with boric and acetic acids

— specialistic shampoo for skin care of dogs and cats, its **acidic pH (in the range of 4,3-4,9)** creates an environment on the skin surface that is unfavorable for the development of microorganisms.

#### Action of active ingredients:

##### **BORIC ACID 2% AND ACETIC ACID 2%**

- have antibacterial and anti-yeast properties
- lower the pH of the skin in dogs and cats (they acidify the environment)

##### **ALANTOIN AND PANTHENOL**

- they soothe irritations, support the natural healing processes and regeneration of the epidermis

##### **ALOE EXTRACT**

- it has a moisturizing effect

The shampoo also contains **RE-GREASING SUBSTANCES (EMOLLIENTS)** that support the reconstruction of the surface epidermal barrier (water-lipid envelope) after bathing the pet.

#### Recommendations for using DR SEIDEL SHAMPOO WITH BORIC AND ACETIC ACIDS

- for skin care of dogs and cats during skin problems therapy caused by bacteria and yeast, with oily seborrhoea and inflammation skin between the toes of the paws (*pododermatitis*)
- effectively removes all dirt from the skin and restores the hair's natural softness and shine

#### How to use DR SEIDEL SHAMPOO WITH BORIC AND ACETIC ACIDS?

Comb your pet before bathing. Thoroughly wet the skin and coat with lukewarm water. Spread the shampoo, massaging vigorously until foam forms. Rinse thoroughly. Repeat, this time keeping the foamed shampoo on the skin for 5–10 minutes. When bathing, protect the ears, eyes, and mouth of the animal.

For skin problems, consult your veterinarian about the frequency and method of use.

**Warning:** Avoid contact with eyes.

# Ear care during external ear canal inflammation and with a tendency to relapse

Volume: 75 ml

## otikor ear care cleaner with boric and acetic acids

— specialistic spray for ear care of dogs and cats, its **acidic pH range of 4,3-4,9**) creates an environment in the external ear canal surface that is unfavorable for the development of microorganisms.

### Action of active ingredients:

#### **BORIC ACID 2% AND ACETIC ACID 2%**

- have antibacterial and anti-yeast properties
- lower the pH of the skin in dogs and cats (they acidify the environment)
- have keratoplastic (soften the stratum corneum), keratolytic (exfoliate callous epidermis) and astringent properties

#### **ALANTOIN AND PANTHENOL**

- they soothe irritations, support the natural healing processes and regeneration of the epidermis

#### **MENTHOL**

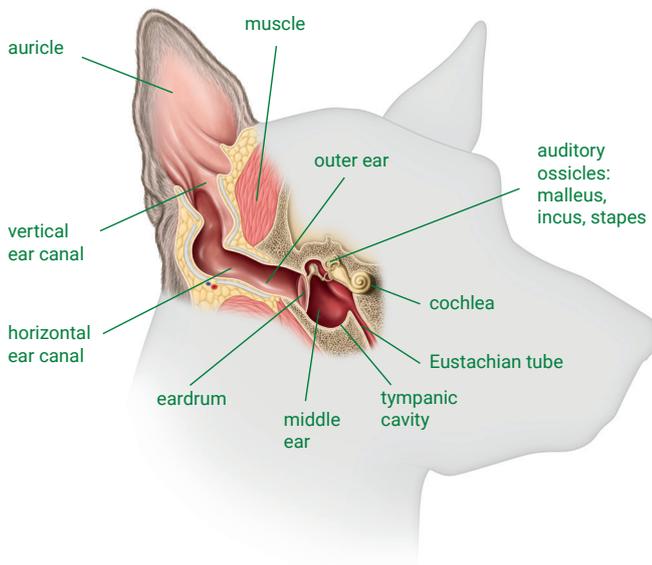

- brings relief from itching, preventing self-damage to the skin in the ear area, which may occur as a result of excessive scratching

#### **GLYCERINE**

- it has a moisturizing effect

### Recommendations for using OTIKOR EAR CARE CLEANER WITH BORIC AND ACETIC ACIDS

- for care during external ear canal inflammation (*otitis externa*) and for regular hygiene with a tendency to relapse
- for ear hygiene in dogs that like to swim
- for care of breeds with long and heavy auricles

Scheme - Structure of the dog's ear (rights to the graphics - Laboratorium DermaPharm).

### How to use OTIKOR EAR CARE CLEANER WITH BORIC AND ACETIC ACIDS?

1. Shake before use.
2. Apply a small amount of liquid into the ear canal and gently massage the base of the ear.
3. Dry off excess dirt with a cotton swab (avoid gauze pads, cotton tipped swabs, or paper towel; they can cause irritation).

#### **SOFT TIP**

- thanks to a special applicator with a soft tip, the use of the liquid is convenient for pet owner and comfortable for pet

For use at home, consult your veterinarian about the frequency and method of use.

**Warning:** Avoid eye contact. Do not use with skin ulcers of the ear canals. If irritation occurs, consult a veterinarian.
