

## Soft, tasty, effective!

Soft pills dr Seidel are innovative dietary supplements in the form of soft tablets that combine effectiveness with a delicious taste.

Each tablet contains carefully selected active ingredients with scientifically proven effects that support animal health on many levels. They are not only easy to administer, but also eagerly eaten by pets. This is a convenient solution that provides effective support for animal health.

### ADVANTAGES OF SOFT PILLS:

**Precise dose** – each bite contains the optimal amount of active ingredients to support your pet's health

**Tasty formula** – you can easily give them to even the pickiest pets

**Soft texture** – easy to chew, perfect for animals of all ages

**No unnecessary additives** – natural recipe without artificial colors and flavors

### FOR WHOM?

Soft pills are an ideal form of supplementation for all dogs and cats, regardless of age and size. Especially recommended for picky, elderly animals and those who have difficulty swallowing traditional tablets.

## HEALTHY SKIN, BEAUTIFUL COAT

### skin care soft pills

– improves the condition of skin and coat

improve skin and coat through the synergistic effect of three specially selected ingredients. Fish collagen helps to regenerate skin and supports its structure to curb redness and flaking. Hyaluronic acid provides deep hydration and skin suppleness. It moisturises the skin and invigorates fur. Biotin (vitamin B7) promotes a healthy and naturally glossy coat.

Recommended for pets with dry, sensitive skin, dull coat, or during moulting. The gluten-free formula is safe for pets with sensitive digestive systems.

- FISH COLLAGEN
- HYALURONIC ACID
- BIOTIN (VITAMIN B7)

GLUTEN FREE

225 g

## HAIRBALLS

anti hairball soft pills – helps hair move through your cat's digestive system

Thanks to the combination of malt and cellulose powder (Arbocel® BWW 40), the product minimises the risk of hairball formation, which causes vomiting and constipation. The active ingredients prevent hair from clustering in the gastrointestinal tract into almost indigestible clumps. This way, the formulation promotes the natural removal of hair, supporting your cat's health and comfort.

The product is recommended for all cats during moulting. Highly recommended for long-haired cats.

- MALT
- CELLULOSE (ARBOCEL® BWW 40)

225 g

## HEALTHY AND STRONG JOINTS

### joint care soft pills

– supports joint mobility and health

Improve joint mobility and flexibility thanks to a unique combination of the highest-quality ingredients. Fish collagen helps regenerate joint cartilage and enhances its elasticity. Hyaluronic acid is like natural grease. It reduces friction and improves joint mobility. Glucosamine helps regenerate cartilage. The product also contains MSM, chondroitin, and vitamin C. MSM exhibits analgesic and anti-inflammatory properties in addition to promoting joint tissue regeneration. Chondroitin keeps cartilage flexible and mechanically fit. Vitamin C promotes collagen production and improves collagen absorbance.

It is especially recommended for animals with degenerative joint diseases, during intensive growth, highly active, or prone to joint problems. The gluten-free formula is safe for pets with sensitive digestive systems.

- FISH COLLAGEN
- HYALURONIC ACID
- GLUCOSAMINE
- MSM
- CHONDROITIN
- VITAMIN C

GLUTEN FREE

225 g

## PROPER DIGESTION

duobiotic soft pills – supports the proper functioning of intestinal microbiota

Combination of probiotics and prebiotics that support the balance of intestinal microbiota. Probiotic bacteria *Enterococcus faecium* help renew the natural microbiota, aiding the immune system and the entire body to cope with digestive system problems. Such prebiotics as chicory root inulin and *Plantago psyllium* seeds play a crucial role in promoting healthy digestion and regulating bowel movement, which improves overall health.

The product is highly recommended for pets after gut microbiota disturbances, during and after antibiotic therapy, and during periods of stress for better overall health and immunity. The gluten-free formula is safe for pets with sensitive digestive systems.

- PROBIOTIC BACTERIA *ENTEROCOCCUS FAECIUM*
- PREBIOTICS

GLUTEN FREE

225 g

## TASTY ATTENTION SUPPORT

taste & play roll-on – meaty treat for improving focus and motivation and reinforcing desired behaviour

The small and handy packaging fits into any pocket. The roll-on makes it easy to keep your hands clean. The product can be used frequently thanks to its low calorific value (1 kcal per 1 ml). For dogs and cats of all ages.

15 ml

### IT IS PERFECT DURING:

grooming (brushing, nail clipping, etc.)

training (new commands or motivating)

veterinary appointments

difficult circumstances, like walks in a crowd or near barking dogs
